

## University of Biskra

### Contribution to the preservation and restoration of terrestrial ecosystems

Following Law No. 98-11 of August 22, 1998 on the orientation and program law with a five-year projection on scientific research and technological development, following Law No. 99-05 of April 4, 1999 on the law of orientation on higher education, following Executive Decree No. 219-98 of July 8, 1998 establishing the University of Biskra, following Executive Decree No. 90-09 dated February 17, 2009 and Executive Decree No. 129-14 of April 5, 2014,

- the University of Biskra leads and encourages actions and activities aimed at the preservation and restoration of terrestrial ecosystems. For this, the University of Biskra organizes afforestation campaigns on the occasion of international and national tree days.
- Furthermore, the University of Biskra has an agronomy department which aims to train executives in the field of preservation and restoration of terrestrial ecosystems and also animals.
- Our university organizes scientific events such as national and international conferences, study days, open days on the preservation and restoration of terrestrial ecosystems.
- The University of Biskra welcomes free visitors (extra-university), students of different levels (primary, middle, high school, and others) in order to promote the conservation and sustainable use of lands such as forests and wild lands, these activities focusing on domestic and wild flora and fauna.
- Our university conducts research projects (national and/or international) with the aim of maintaining and extending the biodiversity of ordinary ecosystems and also threatened ecosystems (plants and animals).
- Given that the Biskra region is an arid zone, the University of Biskra follows a teaching and research policy aimed at the conservation and restoration of terrestrial ecosystems, in particular arid zones, mountains and desert areas. Additionally, our university carries out actions (research projects, scientific events) to identify, monitor and protect all rare listed species, disposal of sensitive waste, disposal of waste covering hazardous materials, protection of water quality, etc.
