

Comprehensive Sustainability Policy

1. Introduction

The University of Biskra is committed to playing a leading role as an academic and research institution in supporting and achieving the Sustainable Development Goals (SDGs). The university integrates sustainability principles into all its academic, administrative, research, and community engagement activities. This policy reflects the university's commitment to environmental protection, social equity, and good governance, in alignment with the specific challenges of its semi-arid regional context.

2. Vision

To become a national and regional model in adopting sustainable practices and to actively contribute to developing innovative scientific solutions to environmental, social, and economic challenges.

3. Objectives

This policy aims to:

- Promote environmental protection and reduce the university's ecological footprint
- Optimize the use of energy, water, and natural resources
- Support scientific research in sustainability and renewable energy fields
- Integrate sustainable development concepts into education and training programs
- Raise environmental awareness among students and staff
- Promote equality, inclusion, and social justice
- Strengthen partnerships with local, national, and international stakeholders

4. Key Pillars of the Policy

4.1 Environmental Sustainability

The university is committed to environmental protection by reducing waste generation, encouraging recycling practices, organizing tree-planting campaigns, and promoting sustainable environmental behaviors across campus.

4.2 Energy and Water Management

The university promotes the rational use of energy and water resources and supports initiatives aimed at improving resource efficiency and sustainability.

4.3 Education and Research

Sustainability principles are integrated into academic curricula, and the university encourages research in key areas such as environmental sciences, renewable energy, desert agriculture, and natural resource management.

4.4 Social Equity and Inclusion

The university ensures equal opportunities for all and promotes non-discrimination, diversity, and inclusion within the academic community.

4.5 Governance and Responsibility

The university applies principles of transparency and accountability in its management and strengthens sustainable governance across its institutional structures.

5. Implementation

This policy is implemented through:

Faculties and research laboratories

Student scientific clubs and initiatives

Pedagogical and scientific committees

Partnerships with environmental and development organizations

6. Monitoring and Evaluation

The university periodically reviews this policy and measures its effectiveness through sustainability performance indicators and internal reporting mechanisms.

7. General Commitment

The University of Mohamed Khider Biskra reaffirms its full commitment to implementing this policy and continuously improving its sustainability performance in support of local and national sustainable development objectives.
