Participation Title	<b>English in the Algerian elementary schools: Facts, Attitudes and future outlooks.</b>
Abstract	In our country, the Algerian primary schools, did not offer the opportunity to their pupils to introduce for them English course from the very first year of the acquisition of 12. Children will absolutely need the language of science and technology due to its status; as well it will open the door for many opportunities in their future professional career.Many researches in the field of teaching and learning languages at an early age see that learning foreign language is easier than learning it in an older age as Chiswick and Miller (2007)emphasized in their study that proficiency in spoken English decreases with ages (Arab world English journal (AWE) June 2015), that's why it is important for children to learn English language because it is a global language spoken in many countries so it is important to introduce it primary schools .
Key words (Max 5 words)	English course, young learners, third elementary grade, language learning and teaching. .
