<b>Selected track</b>	ESP CONTRIBUTIONS IN Reforming Teachers Training Programs
<b>Abstract</b>	<p style="text-align: center;"><b>The Prerequisite of ESP Teachers' Pedagogical Training in the Algerian Higher Education</b></p> <p>ESP teachers in the Algerian Higher Education are, most of the time, general language teachers who are appointed to teach in a specific environment with general language skills. This may result in a number of challenges notably their inability to cope with the subject specific knowledge and their difficulties to design adequate course and syllabus that meet their students' target and learning needs. This present research stresses the need of personal and professional teachers' training to enhance their quality teaching and self-development. It also ends up with a suggested programme for practitioners who teach English for Management.</p>
